To install Simply Sand Play on a Windows PC follow these steps:

1. Go to <u>https://simplysandplay.com/downloads</u> and click on the "download now" link for the PC version.

Simply Sand Play	Pricing	Downloads
Downloadable Simply Sand Play Version	5	
These versions can be downloaded, unzipped and installed on Windows PCs or Mac machines (i.e. they do not run in a browser). In some c required to login to the installable version when it starts using a subscriber's use	ases these ve ername and p	ersions will perforr bassword.
Installable version for Windows PCs:		
download Windows version		
Windows installation instructions		
Installable version for Macs (not Ipads):		
download Mac version		
Mac installation instructions		

2. Depending on your browser you may be asked where you want to save the file or it may go straight to your download folder. Chrome (shown below) typically shows the download on the bottom left of the browser screen. You can click on the arrow by the file name and then click "Show in folder" to take you directly to the file location. If using another browser go to the download location using File Explorer.

	Open	support@simplysandplay.com
	Always open files of this type	Simply Sand Play LLC
	Show in folder	Duine and Duine
	Cancel	<u>Privacy Policy</u>
🐇 SimplySandPlayInsexe	~	

3. Once you locate the SimplySandPlayInstall_PC_0731.exe (note: version date at end of file name will change occasionally) right click on it and select "run as administrator". If you are not an administrator on your computer you will get a popup asking for the administrator's username and password. If you do not have administrator rights just install it by double clicking the file. (If the undo and reload features do not work in the application it's because it was not installed as administrator but it's likely this feature will still work.)

4. You may get a warning from Windows like this. It's ok to proceed. Click on "More Info".

5. Click on "Run Anyway". We are working on getting our application certified but be assured it will not harm your computer. There could be a delay before the application screen appears. This is due to a virus scan most likely.

6. The installation program will start. Click "Next".
